

FIG. 1

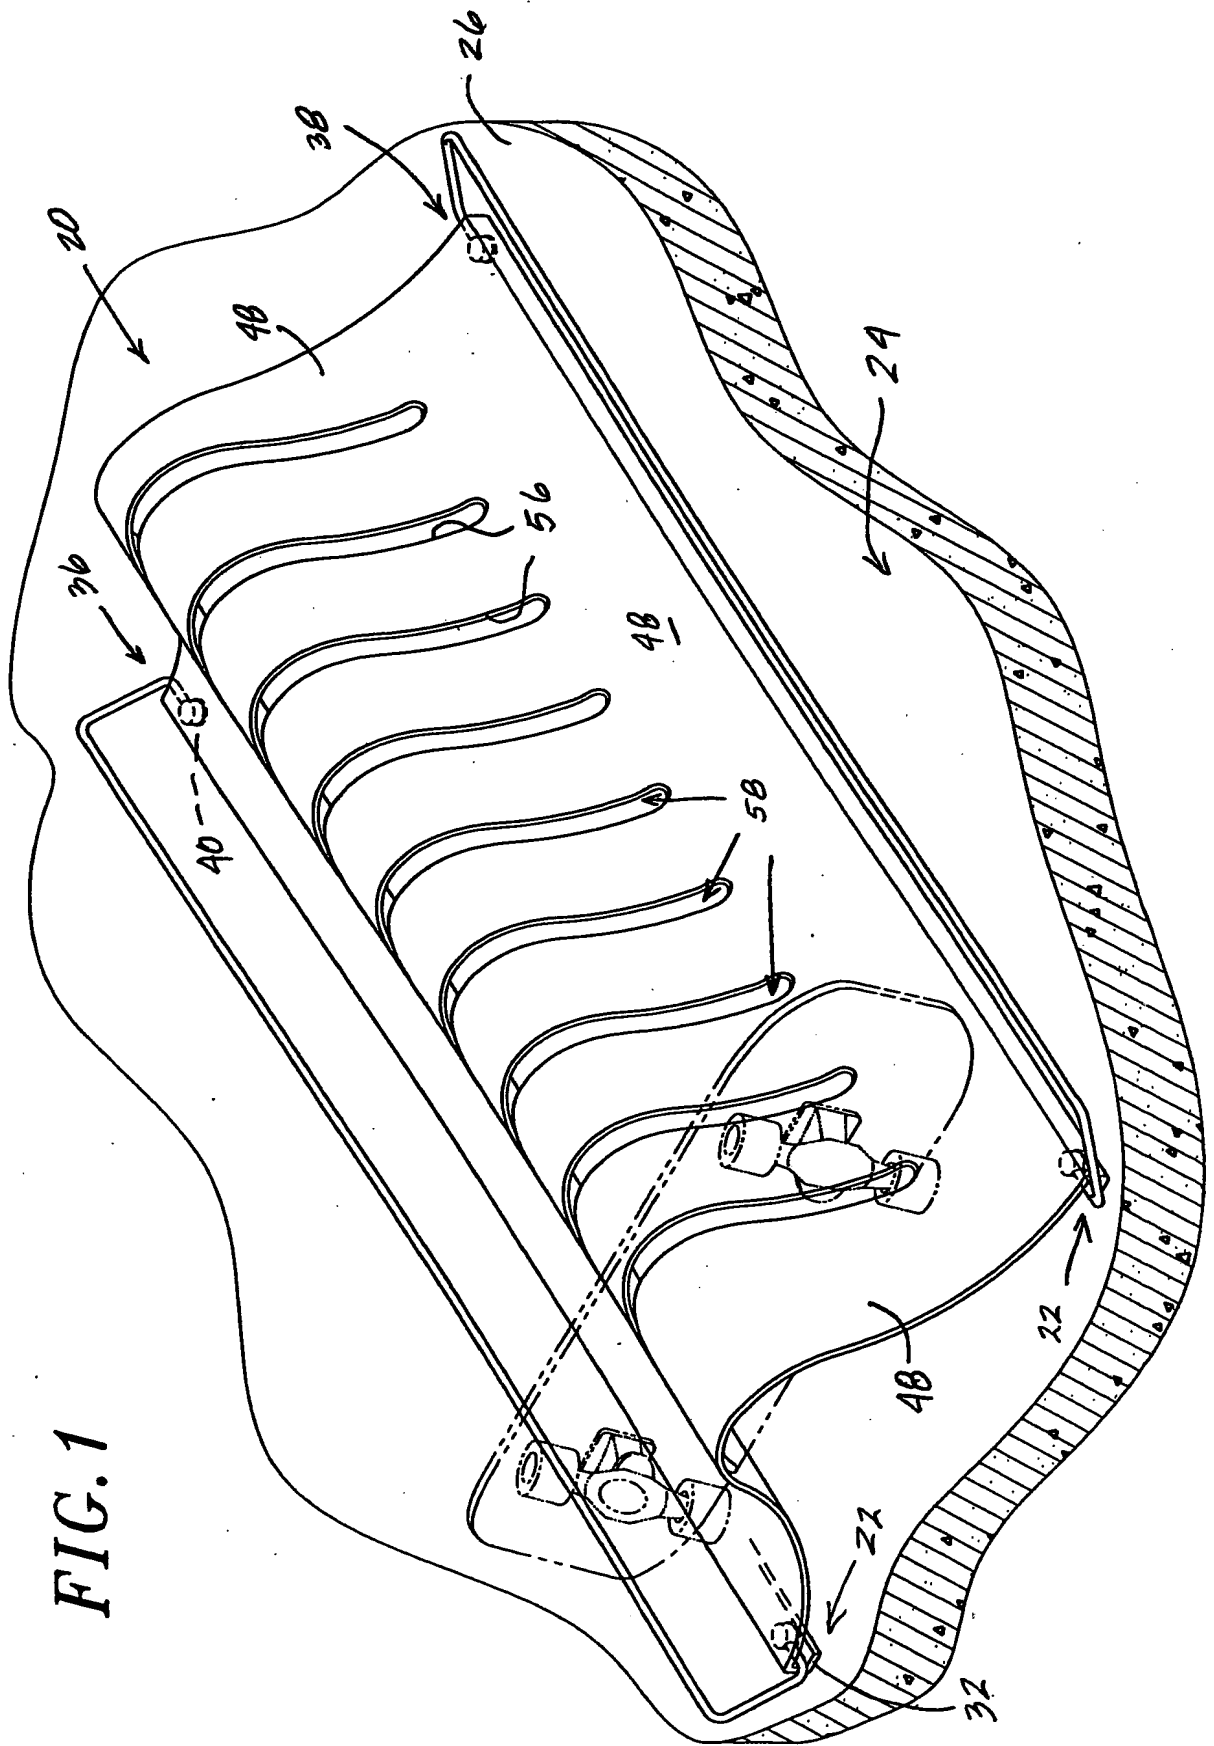

FIG. 2

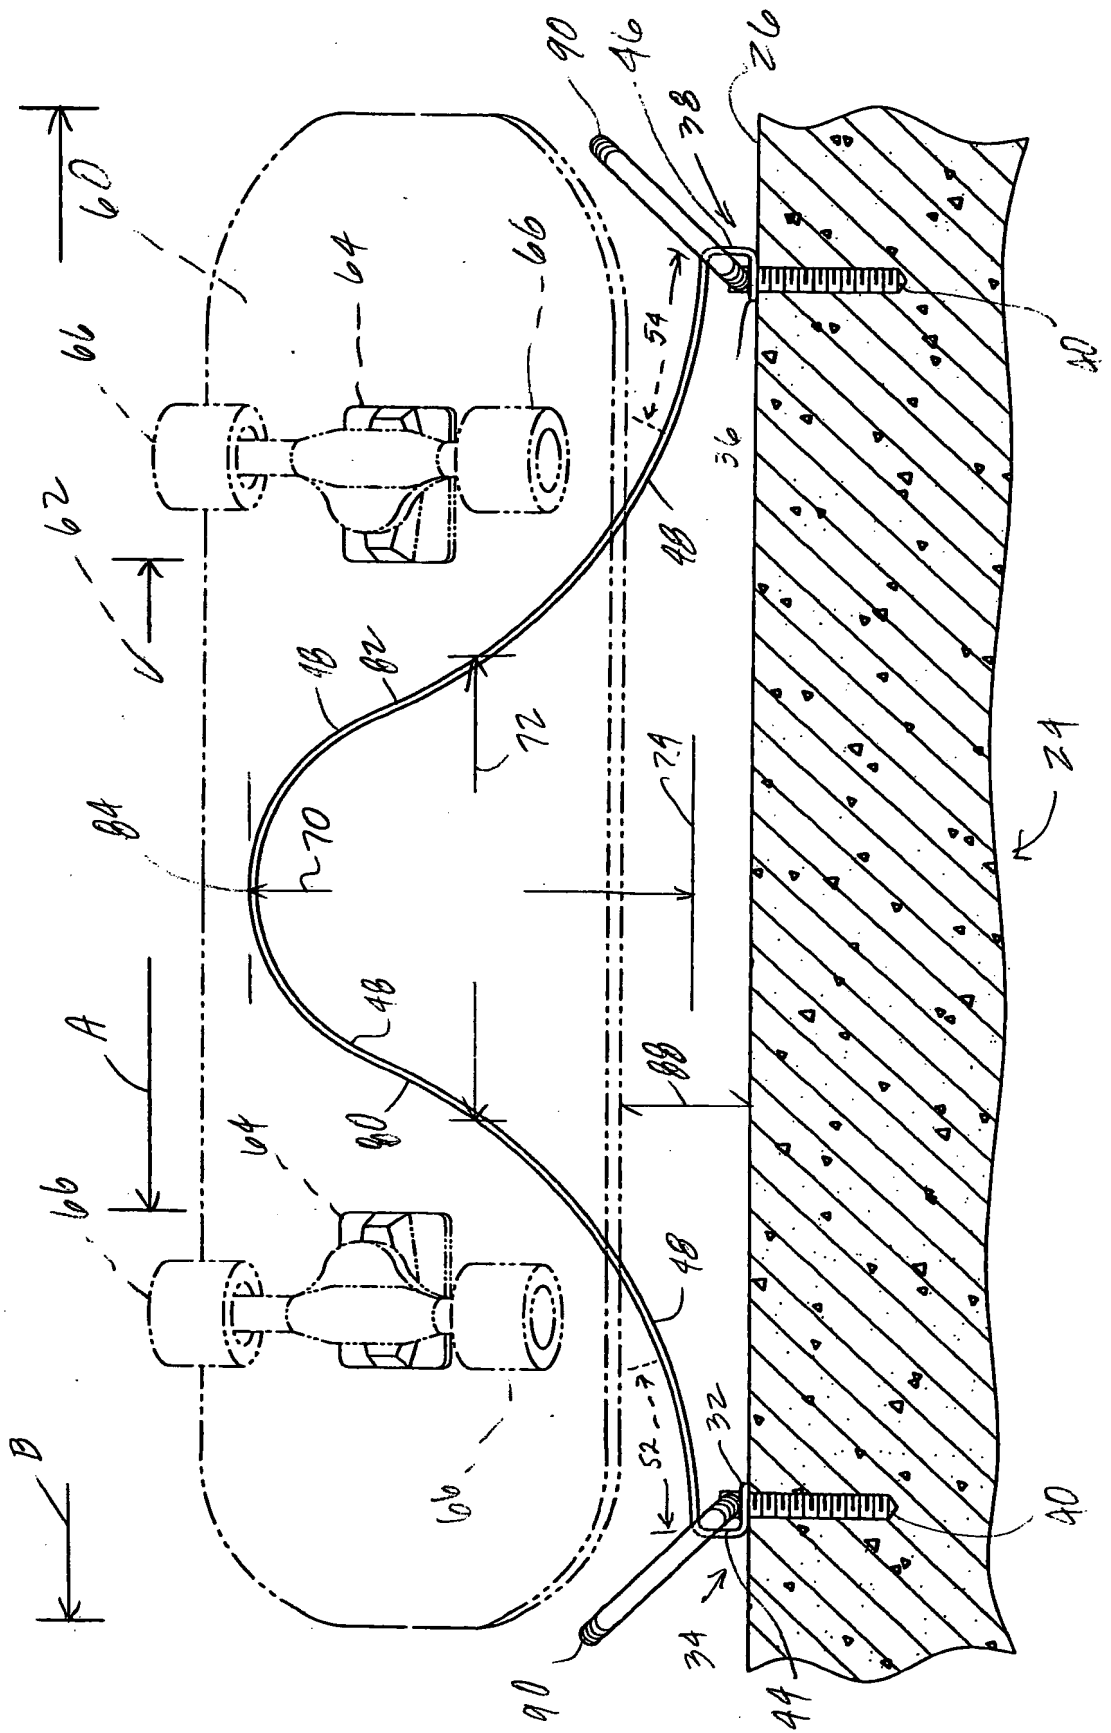

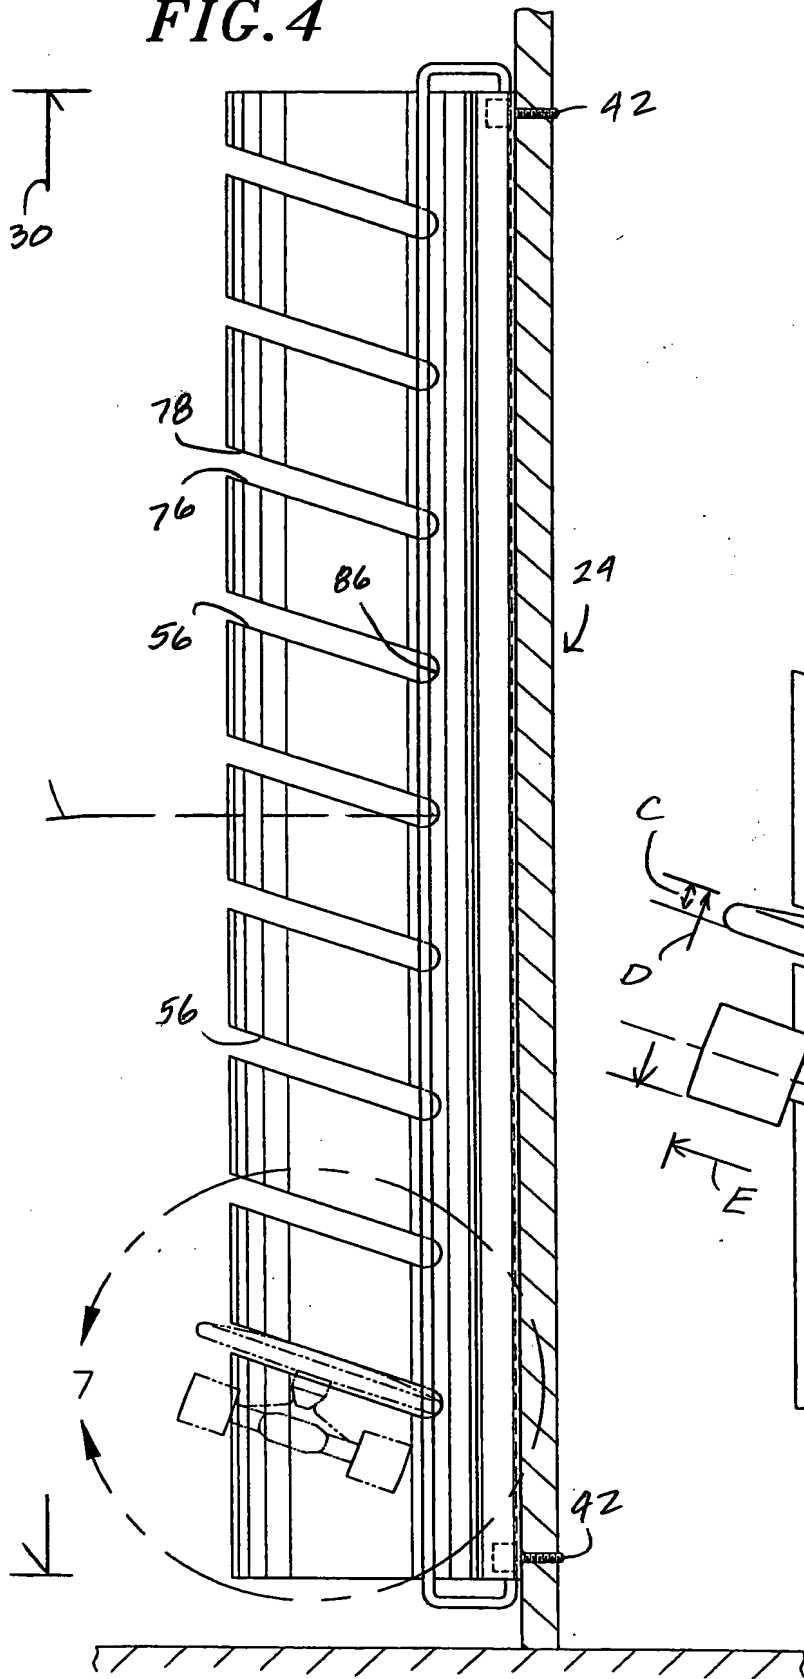

FIG. 1 is a perspective view of a first embodiment of a portable electronic device. The device includes a main body (20) with a display (22) and a keypad (24). A cover (26) is shown partially open, revealing internal components such as a battery (30), a microcontroller (32), and a speaker (34). The cover is hinged to the main body at 36.
